

State of the Data: Assessing the FAIRness of U.S. Geological Survey Data

Hutchison and others, 2024

Supplemental File 3: Example Datasets

title	dataset link	year	total FAIR score
GIS for focus areas of potential domestic resources of 11 critical minerals-aluminum, cobalt, graphite, lithium, niobium, platinum group elements, rare earth elements, tantalum, tin, titanium, and tungsten (version 2.0, August 2020)	https://doi.org/10.5066/P9U6SODG	2020	89
Data Supporting Generalized models to estimate carbon and nitrogen stocks of organic layers in Interior Alaska	https://doi.org/10.5066/P960N1F9	2020	87
Texture-Based Estimated Equivalent Horizontal Hydraulic Conductivity of the Glacial Deposits	https://doi.org/10.5066/F7BR8QCZ	2017	86
Northern Continental Divide Ecosystem grizzly bear (<i>Ursus arctos</i>) genetic profiles (1998-2012)	https://doi.org/10.5066/F7Q81B63	2016	85
Priority Ecosystem Science Program: benthic community and bivalve metrics data in Grizzly Bay and San Pablo Bay (2019-20)	https://doi.org/10.5066/P98M0EGD	2021	85
